EXECUTING CRIMINALS.

A great hue and cry is being raised because it is supposed that Kemmler, the murderer, suffered a painful death.

Well, suppose he did? Probab- gineering. ly the victim of Kemmler's murderous heart suffered a painful death also. A man who deliberately murders a woman ought to die a painful death.

But if it is the aim of the law to simply to put a man out of existance, the APPEAL would saggest death by asphyxiation.

There is a gas in the Comstock mines that produces the most painless of all known deaths. Science could easily determine the chemical constituents of the death damp that so quickly and painlessly administers death to the miner.

Over and over again instances are recorded where men in mines have been touched by the gas and died as quickly as the light of the candle that fluttered out at their sides.

On one occasion a miner was knocking a hole through a bulk head, when the gas came through the opening. There was a smile on his face and a jest on his lips, when the gas came into his face. He sank down instantly in the middle of a sentence and was dead in less than a second, with the smile on his face and no sign that he felt pain.

Why could not this gas be introduced in a closed compartment? Seat the prisoner in a chair in this close compartment with glass doors, and allow the gas to enter. He sinks back in his chair dead, without a pang of mental suffering.

With this subtle gas the angel of death would touch him and. pass on, and he would never know the smallest fraction of a second after that, what caused him to be ushered out of the world.

Scientists searching for painless executions will find this one the best of all. No straps, no black cap, no machinery, the agent of destruction absolutely invisible.

Simply two small rooms, one containing the condemned man and one the gas. A sliding door drops down and the victim, absolutely seeing nothing but empty air, drops into an instantaneous sleep and passes to the beyond.

Good Agricultural Land for \$10 to \$20 per Acre.

The Pacific Improvement Company

The Pacific Improvement Company has recently purchased twelve thousand acres of land in the heart of Tehama County, for the purpose of promoting subdivision and settlement. This land embraces lands from first class Sacramento Vailey agricultural land, to land of fair average quality, and is offered at from \$10 to \$20 per acre, in subdivisions of 40, 80, 120, 100 and 320 acres.

The terms upon which these lands are offered are especially attractive. They will be sold in subdivisions, as above indicated, by the rayment of interest only for three years, at which time the purchaser can begin the payment of principle by paying the first of five equal annual installments. Thus no part of the principle is to be paid for three years, and then the purchaser is to have five years in which to pay five equal annual installments, with Interest at the rate of seven per cent. per annum, making payments extending over a period of eight years. Intending purchasers are assured that this is an opportunity to purchase land of fair average quality at \$10 per acre, and good agricultural land at \$20 per acre, with other grades of land at prices to corres pend between these figures.

The assertion is frequently made that good lands, suitable for general farming and especially adapted for fruit growing cannot be had in California for less than from \$50 to \$100 per acre. An examination of the land subject of this advertisement will prove to home seekers that this is an opportunity for the purchase of good agricultural land at \$20 an acre, and for qualities grading down to fair agricultural land at \$10 an acre on terms of payment which should make the disposition of these lands to actual settlers a result easy of accomplishment.

The primary object of the purchase of this body of land was the breaking up of a large holding for the purpose of premoting its settlement in smeller quantities and its devotion to dilligent husbandry.
